REFRIGERATOR FOR COUNTRY TEMPERATURE ONCE UNIFORM

Scheme for Keeping Things Cool in
 the Well When Ice is Not
 Procurable.

A country place is not always situated where ice can be procured during the summer months and a substitute refrigerator must be provided. A resident of a country place devised a cooling apparatus which he placed in his well. The device consisted of a box about one foot square made of

boards having a length to reach almost to the water level and to extend about four feet above the platform of the well. A short box containing several shelves is made to slip easily into the long one similar to a dumb waiter. This smaller box is lowered and raised with an old-fashioned windlass. The smaller box containing the shelves is filled with things to be kept cool.—Popular Mechanics.

HINTS FOR THE HOSTESS

Attractive Way to Serve Banana Ice Cream—How to Combine Apricots With Curacao.

Banana ice cream has quite a festive appearance when served in sherbet glasses and decorated with frosted slices of bananas and preserved cherries, which should be stoned and entirely freed from superfluous juice. To frost the bananas, dip the slices into a thin white icing similar to a cake frosting. The slices should be merely glazed and not heavily coated. If it is inconvenient to frost the bananas the slices may be used plain.

Snowballs of ice cream are very attractive when served with snowballs of cake on a wintry night when real snow is flying out of doors. To prepare the cake, cut out rounds of white lady cake, free it from crust and dip it into cocoanut frosting. If a little cocoanut is sprinkled over the ice cream balls the two will look so much alike that one can hardly tell the difference.

A famous chef served apricots with Curacao. Remove the juice from a pint can of apricots. Add a table spoonful of sugar and the rind of an orange to the juice. Let it boil ten minutes; then remove the rind. Still in two tablespoonfuls of Curacao and pour it over the fruit. Serve when cold.

A few spoonfuls of Curacao add a delicate flavor to sliced and sugared oranges. Almond flavoring is very nice with boiled dumplings and batter puddings in which cherries or peaches are used. Do not, however, have more than a suggestion of this flavor.

Cleaning Bagdad Rugs. It is very difficult to wash a Bagdad couch cover or rug successfully. The colors are almost sure to run when treated in the ordinary way. Before beginning operations separate the strips. Then wash each one in a separate water. Use white soap and lukewarm water to which a little salt has been added after a suds has been raised by brisk stirring. Do not rub the strips on a washboard, but merely flip them into the water and stir them briskly, then quickly rinse them and hang them over a clothes horse in the kitchen away from the sunlight. Be careful when drying that the strips do not overlap. When almost dry press out the wrinkles with a hot iron. If the middle strips have become slightly worn exchange them with those on the outside, when sewing the cover together again.

Glazed Fruits and Nuts. Boil without stirring for 10 or 11 minutes one pound granulated sugar and one-half cup water. Test in water and when brittle remove from fire, add one tablespoon lemon juice and set the pan containing the candy in a bowl of hot water. With a long pin or needle immerse section of oranges, grapes, figs, almonds, walnuts or pecans and set upon oiled papers. The fruit or nuts must be thoroughly dry before dipping into candy.

Boiling Hint.

When boiling rice or beans two things which will boil over, put in a lump of butter size of a walnut and this will stop the trouble at once.

Early Condition of the Globe That Accounts for Deposits of Coal Near South Pole.

As a general statement, it may be said that the sun's rays heat the earth and that the earth heats the air, but the extent to which this goes will depend much on the clearness of the atmosphere. The clearer this is the more the rays of the sun will pass through it without losing their heat. Obviously, the cloudier or thicker the air the more the sun rays will be absorbed.

Conversely, on the brightest nights the earth will lose the most heat from radiation, and, becoming colder than the atmosphere, moisture from this will be deposited in the form of dew.

In the younger days of the earth, when the seas were boiling hot, and perhaps for millions of years afterward while they were gradually growing cooler, there must have been an atmosphere so surcharged with steam as to prevent completely the passage inward of any heat rays, or outward radiation. As a necessary consequence of these conditions there is supposed to have been one uniformly hot temperature all over the earth, there being no difference between what are now the tropics and the arctic regions.

When the temperature had fallen sufficiently to allow the development of the gigantic ferns that were to form our coal deposits, things grew as luxuriously in what we now call the temperate and arctic zones as at the equator. Consequently, there was nothing very surprising at the discovery of a vast deposit of coal by Lieutenant Shackleton not far distant from the south pole.

RECIPROCITY.

Nephew—Aunt Fuss, you're always borrowing trouble.
 Aunt—Well, I always pay it back, don't I?

SONS OF FAMOUS FATHER.

Discovery of the grave of Walter Landor Dickens in a Calcutta cemetery is a reminder of how the sons of the great novelist were dispersed. This soldier son died in India; another, Sydney Smith, entered the navy and at twenty was buried at sea; a third, Francis Jeffrey, joined the Canadian northwest mounted police, and two others—Alfred Tennyson and Edward Bulwer Lytton—settled in Australia. A. T. Dickens recently returned from the antipodes and has been touring England with an interesting lecture on his famous father. E. B. L. Dickens died in Sydney at fifty-one, after representing Wilcannia in the New South Wales parliament for six years. Charles and Henry Fielding remained in their native England. H. F. Dickens, K. C., is still in that country.

WHICH ARE THEY?

Mrs. Buffington, who is frequently heard to expatiate upon the advantages she has derived from knowing two or three foreign languages, was descending in the elevator the other day with her two children and the French maid—who, by the way, speaks English fluently—when she discovered that she had forgotten something.

"Marie," said she to the maid, "I must return to the apartment," and then, as with sudden inspiration, she added, "Attendez vous au door!"

SWORD OF BRITISH OFFICER.

The war office is said to be contemplating the provision of a new sword for cavalry officers, which is to resemble the weapon now carried by troopers. Instead of the slightly curved blade, intended for cutting as well as thrusting, they are to be given a light, straight bladed weapon, intended solely for thrusting.—Westminster Gazette.

CARNIVAL OR ST. FAIR

The Rock City Amusement Co., one of the best Carnivals on the road, under the auspices of the Base Ball Club, on Base Ball Grounds, for

One Week, Beginning Monday,
 March 27th,

Every Afternoon and Night. Saturday
